

NEW CASE MANAGEMENT SYSTEM

The Workers' Compensation Court is excited to report that it has implemented a new case management system — Clio. This transition should seem seamless to those practicing and appearing before the Court, with few exceptions. Cases will be numbered with the current year followed by five chronological numbers, i.e., 2023-00001, 2023-00002, etc. Cases that are currently "open" will be transferred into the new system and will be assigned a new number as well as retain their existing WCC Nos. Docket reports will still be available with all the relevant information, but appear in a slightly different format.

We look forward to hearing from you should you have any questions.
